ÖSTERSJÖSTIFTELSEN
THE FOUNDATION FOR BALTIC AND EAST EUROPEAN STUDIES

Welcome to the 9th CBEES Annual Conference!

The Russian assault on Ukraine has brought about the largest war of invasion and annihilation in Europe since the end of World War Two, leading to massive loss of human life and the destruction of communities, the natural environment, and cultural heritage sites, enacting multiple changes on all levels – in the region and globally. Along with the ongoing reconfiguration of the security architecture in Europe and beyond, and the opening of homes and hearts to Ukrainians, the war has unleashed new and existential concerns about the global economy and democracy, as well as altered approaches to cultural and identity politics. Finally, the international response to the war showed solidarity with Ukraine and revitalised discussions about peacebuilding.

The aim of the 2023 CBEES Annual Conference is to expose, map and discuss the implications of some of these changes for the region's future. The conference focuses on critical discussion of the multiple effects and consequences of the Russian war on Ukraine but is also open for broader comparative historical perspectives on the impacts of wars and military conflicts in the history of the Baltic Sea region and Eastern Europe, including Central Asia and the Caucasus.

Conference themes:

- *authoritarianism, democratisation, and historical legacies of state building,*
- *(neo)imperialism and securitisation,*
- *the influence of war on cultural life and societies,*
- *conservatism, anti-gender, and changes in the context of the war,*
- *environmental destruction and energy concerns,*
- *geopolitical shifts, regionalism, and European integration,*
- *migration and lived experiences of refugees,*
- *knowledge production and decolonisation,*
- *crisis responses and societal resilience.*
